1	we'll organized	6/25/2016 10:50 AM
2	Great Conference! I learned so much and met phenomenal contacts. Thank you!	6/24/2016 11:02 PM
3	Start program earlier in the week and end at noon Friday. Field trip would have been good addition to overall agenda.	6/24/2016 12:52 PM
4	Slide changer was problematic.	6/21/2016 6:56 PM
5	Magnifico!	6/21/2016 5:30 PM
6	Networking should be improved maybe using roundtables of discussion according to some topics	6/21/2016 2:04 PM
7	The coffee was spectacular	6/9/2016 8:18 PM
8	IDB is an incredibly organized group - that made these review items superb.	6/9/2016 1:42 PM
9	The environment and location of the discussions was very good.	6/9/2016 12:18 PM
10	The quality of the participants was incredible.	6/9/2016 12:11 PM
11	Great organization...however an all-vegetarian event would be great to reduce GHG emissions	6/9/2016 11:51 AM
12	Right emphasis on business opportunities, not just recitation of business risks from adaptation and resiliency.	6/9/2016 11:49 AM

1	Don't have the next one conflict with a US Holiday weekend.	6/24/2016 11:02 PM
2	Liked the format very much -- good audience participation. Good balance of presentations and discussions.	6/24/2016 12:52 PM
3	A true learning experience. Well done!	6/21/2016 2:02 PM
4	there was an overwhelming presence of north American examples/presentations. I had expect to have more presentations and examples from latin American countries. The reality in these countries is so different from the well advanced insight in the US. High performing latin American examples may have been more inspiring to the audience.	6/13/2016 2:35 PM
5	Each panel should have a longer duration	6/10/2016 8:49 AM
6	Some repetition during the 3 days.	6/10/2016 7:44 AM
7	I would recommend more time for questions/discussions. Also, I would try to make more use of the experience and knowledge that is available in the room.	6/9/2016 3:30 PM
8	The message was clear for governments, investors and civil society. The knowledge of the expositors and the deepness of the issues was very compromising. Latin american governments and politics have heavy lack of commitment in protecting the environment, due of absence of knowledge and cultural behavior. It is time to bend this trend and work for the future protecting our planet.	6/9/2016 12:18 PM
9	Lots of new information that was current.	6/9/2016 12:11 PM

Answered: 20 Skipped: 23

#	Responses	Date
1	No	6/25/2016 10:50 AM
2	No but we need a dedicated conference on medical resilience and investing.	6/24/2016 11:02 PM
3	From an agricultural perspective, perhaps more farmer or rural biz leaders to speak of their own experience.	6/24/2016 6:16 PM
4	Include case studies next time -- we are creating these now.	6/24/2016 12:52 PM
5	One of the best events I've been	6/24/2016 12:11 PM
6	More balance representation from Latin America experiences and speakers	6/22/2016 9:36 AM
7	Need more medical/healthcare topics	6/21/2016 6:56 PM
8	Would have been good to have some LAC SMEs with actual climate resilience products, services. Tough to find I know	6/21/2016 5:30 PM
9	more presentations of projects outside proadapt	6/21/2016 2:04 PM
10	not only economic viable oportunities of Climate Change but more enfasis on environmental neutrality. Otherwise, business oportunities from Climate Change may in itself contribute again to even more climate change/greenhouse gases/environmental damage.	6/13/2016 2:35 PM
11	The panels could be one after the other and not simultanemante. So we can expand our knowledge of all topics presented	6/10/2016 8:49 AM
12	None	6/10/2016 7:44 AM
13	Still need more focus on private financing. Definitely a step in the right direction, but there is more work to do and more investors are required.	6/9/2016 8:18 PM
14	early days yet - but if there is a repeat of this conference then it would be good to start securing corporate participants	6/9/2016 3:14 PM
15	Enfocar los temas un poco más en Latinoamerica	6/9/2016 3:09 PM
16	Climate Resilience Education	6/9/2016 1:48 PM
17	More ideas for projects.	6/9/2016 1:42 PM
18	Yes, authorities still give licence for dangerous mining and other industrial activities that "clean" dirty activities. Corruption is attached to this behavior, and the impact to the environment is huge.	6/9/2016 12:18 PM
19	Might have been more on insurance	6/9/2016 11:49 AM
20	Bottom-up approaches, especially in the LATAM context, lessons learned, micro solutions	6/9/2016 11:45 AM
